(OPTIONAL)
LONG DURATION**

**WITH SOLAR
CHARGER PORT**

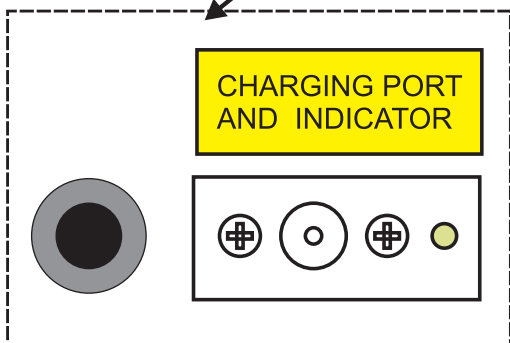

PRESS TO GLOW WHEN SLIDING SWITCH IS IN POSITION NO. 2

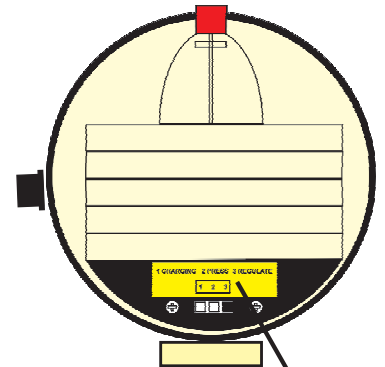

SIDE VIEW OF THE TORCH

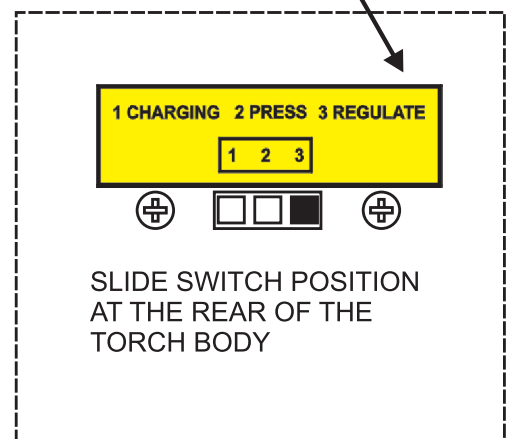

Rotate Clockwise to increase the illumination of the Torch when the slide switch is at position no. 2

The Torch is powered by a 3 watt LED. The Energy is stored into a 6 V 4.5/4 AH Sealed Maintenance Free battery. The unit has a sliding switch at its rear that has 3 positions. At position 3 the rotary potentiometer can be operated for changing the illumination by rotating it clockwise to increase and in opposite direction to decrease. This feature is provided to enhance the duration time of the battery during normal short distance usage.
